## HYDROGEN SERVICE

### BALL VALVES HYDROGEN SERVICE

When working in high-pressure conditions safety is crucial due to the explosion potential, and emissions must be reduced to Zero. Pekos is committed to offer a full range of valves for all uses, supporting the industries to overcome the new challenges this changing world giving the best solutions for each specific case the industry may need.

### VALVE SOLUTIONS FOR HYDROGEN SERVICE

To get in line with today's world issues, we at Pekos have come up with a solution for hydrogen service that can apply to all our portfolio of valves. With a technical solution based on our security stem extension with double stem packing, we ensure Zero emissions and safety control system.

### MATERIAL COMPATIBILITY

All used materials for valve and stem construction are compatible with hydrogen media.

LET'S TALK :
