# Pekos Solution for Hydrogen Service

## Pekos has designed a technical solution for H2 and dangerous services.

Pekos follows and works on developing solutions to face the new challenges of the current industry and new energy technologies, which comply with the highest demanding applications and the latest standards and technical requirements.

Hydrogen emerges as a novel energy source, produced through various methods like Green, Blue, or Grey Hydrogen, among others. Pekos Valves now offers valves with an advanced technical enhancement guaranteeing tightness and compliance with the stringent fugitive emission standard ISO15848-1 AH endurance CO3.

Pekos contributes to emission-free and carbon-neutral goals, ensuring tight shutoff, maintenance-free stem design, double sealing, being a perfect solution for Hydrogen, and other hazardous services.
